SHINE

SHINE

We want to help you identify the most important attributes that will make your home the most enjoyable environment to live in. It's important we establish these during the design / planning stage to ensure the correct infrastructure is in place to achieve the home you dream of. To help determine your thoughts and aspirations we have created our SHINE plan, which represents 5 key areas, Security, Home Entertainment, Integrated Lighting Control, Network (Internet and Wi-Fi) and Energy Saving.

Security - It might not be at the forefront of your mind, however addressing the type of security you want in place when the home is complete, ensures the right cabling is in place to support the system you require. Whether it be CCTV cameras, a keyless entry, gate entry and / or video doorbell.

Home Entertainment - To avoid having unsightly wiring, we'll discuss where you plan to watch television, where you'd like to listen to music and whether you desire a dedicated entertainment room or home cinema. We'll ensure you get the best sound and picture quality for all your entertainment needs.

Integrated Lighting Design - Having a professional lighting design carefully considers light placement, enhancement of architectural and / or interior features, convenience of control, mood lighting, light quality and energy saving.

Network - As more of the content / programmes we watch and listen to is streamed or downloaded from the internet, it's essential the network can support numerous devices and users simultaneously.

Energy Saving - Having an easy way to control your heating and lighting means you can manage individual rooms and monitor your energy usage.

SECURITY

Customise your home security system

In the current climate we understand how keeping an eye on your property / business premises remotely is more important than ever. We design our systems around protection and prevention. With advanced alerts to stop intruders / criminals before the point of entry. Our systems are designed to meet your individual needs.

Keyless entry and biometric readers add an extra layer of security.

Use light to your Advantage
Program your lights to create a lived-in effect when you're away from home.

Keep an eye on your property from anywhere in the world.

With our CCTV and Security Systems we can program it to alert you when an intruder is detected and enable you to view live CCTV images whilst away from home.

HIKVISION
CERTIFIED PARTNER

HOME ENTERTAINMENT

We'll listen to your requirements and design an entertainment space that suits your style and budget. Whether it be a dedicated cinema room or a multi-functional space, we'll see it through from concept to completion.

**Masters of creating unique
Entertainment spaces**

Control **4**

OUR DESIGNS

We can create 3D renders of your room to show exactly what can be achieved in your property.

MEDIA WALLS

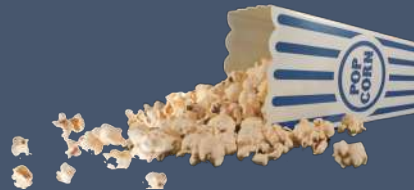

Media Walls - Love watching films but don't have the space for a dedicated Home Cinema? A media wall could be the perfect solution! With the cabling, speakers and equipment hidden from view, you can have an impressive entertainment space designed to your taste and style.

Stylish Solutions - Media walls can be created using acoustically transparent fabric panelling, with hundreds of colours/ patterns to choose from. This could be combined with contemporary wooden slats with LED accent lighting to create a modern living space.

Family Entertainment

Transform your day room into a home entertainment room, perfect for watching family movies!

LIGHTING DESIGN

Compliment your Architectural and Interior features with a professional lighting design

Lighting requirements have changed in today's modern home. Lights are traditionally wired so that one switch controls one lighting circuit and is usually just an on / off switch.

Now we can program any switch to control any number of lights simultaneously, produce the right level of light and create a mood within your home.

LIGHT THEORY

In photography there are four considerations when taking photographs regarding the lighting, quantity, quality, colour and direction to get the best shots. These practices need to be considered in our homes in the same way.

There's a world of Interior and Exterior lighting options to explore

The world is your oyster when it comes to LED lighting, it's a great way to add that extra touch of glamour and personality to your home. Not only can you incorporate LED strip lights into ceiling coffers to create a unique feature, flexible LED strip can also be used in handrails on stairways and in furniture and bookcases.

GET CREATIVE
WITH LIGHTING

GARDEN LIGHTING

Gardens are an extension of our homes. Lighting can make a dramatic impact and create a cosy and inviting environment to relax and explore.

Outdoor lights and garden lighting may be installed for a variety of reasons from security lighting to protect your home, to highlighting pathways and enhance interesting and beautiful features in your garden.

NETWORK

INTERNET AND WI-FI

It's vitally important to get reliable internet and Wi-Fi throughout the home.

The heart of any modern home is a robust IT Network, in fact we would go as far as to say it is one of the most important things to get right and the most common area that people forget about!

The number of connected devices within the home is greatly increasing, meaning hard-wiring the internet to TV's and essential home devices is more reliable, faster and more secure and also eases the pressure on the Wi-Fi network.

ENERGY SAVING

Save between 30 - 50% on your Energy bills.

Lighting and Heating control at your fingertips. Even when you're away from home you can control the temperature and ensure the home is warm for when you return home.

TEMPERATURE CONTROL

By installing SMART heating and / or integrating it with your lighting scheme, you'll have COMPLETE CONTROL of your heating in every room. Creating a comfortable living space and maximising energy efficiency.

WHAT TO DO NEXT?

1. Email us your plans

We work closely with your Architect, using your approved building plans to create a SHINE plan which covers the 5 key areas we have covered in this brochure; Security, Home Entertainment, Integrated Lighting Design, Network (Internet and Wi-Fi) and Energy Saving.

2. Initial Brief

Your ideas and desires forge the design for your SHINE plan, ensuring we discover how you want the home to look, feel and function. We take you on a journey through the home, imagining how you want it to complement your lifestyle. Looking at where you plan to watch TV and listen to music, what feeling and atmosphere you want to create in each room. We delve into the detail of how you want to control your lighting, whether you're having unique architectural or design features that deserve to be showed off and how you want to add the **WOW factor!**

3. Quote & Final planning

Once we've assessed your requirements we produce a detailed plan and quote to show what can be achieved with your estimated budget. This can be adjusted and fine-tuned to your needs and a final plan will be drawn up.

4. Collaboration and Project Management

The key to achieving your dream home, is through integration. As an Integrator, we ensure that when the final plans have been agreed, all contractors involved follow the same building specifications.

We can project manage your installation to take the stress away and keep everything on track to complete your Dream Home!

5. Enjoy your new home!

Now your home has been built to your exact specifications, it's time to enjoy the benefits and fulfilment of your new home!

Start your Journey Today

We've devised a questionnaire to help explore your thoughts and evaluate your priorities for your new home. Scan the QR code to visit our 'SHINE plan' webpage and complete our SHINE survey.
